#SOLENTSTORIES

Francky Victor

International Foundation Programme (Business and Management)

"My experience at Solent University so far has been wonderful; the teachers and institution have exceeded my expectations and I'm satisfied with the teaching I'm receiving.

The lecturers have helped me so much; they always try their best to make sure we understand what we're being taught."

International Foundation Programme

The International Foundation Programme is designed to develop your academic skills and English language levels to progress on to an undergraduate degree.

You can complete the programme in two or three terms. The three-term option includes an initial term of English language tuition if you need extra support with your English level.

Pathways to choose from

Business and Management Pathway

The Business and management pathway has a particular focus on external business pressures and management theory. This equips you with the essential skills to maximise your learning in a wide range of disciplines, from business and management, to marketing and accounting.

Creative Industries Pathway

The creative industries pathway introduces you to the key principles and skills in media, art and design. You will have the opportunity to develop your knowledge in an area of which you have a particular interest within the creative industries. The aim is to develop your creative capacity, confidence and skills, so that you are able to communicate your ideas effectively. You will be well placed to progress onto creative or media-related undergraduate degrees.

STEM Pathway

The STEM pathway will teach you the fundamentals of scientific and mathematical reasoning, developing your use of statistics to test hypothesis and validity of scientific data. Assessments are based on demonstrating the application of the theory in projects and portfolios that are typical at undergraduate level, leaving you well-placed for successful undergraduate studies in a range of fields including sustainability, biomedical science and design and manufacture.
